

# Mpower gold diesel common rail

## Additional unit for diesel engines

The electronic control unit for additional diesel generation Mpower gold is compatible with vehicles with diesel injection systems, common rail, injector pump, rotary pump. Mpower gold is an additional module (chip tuning) to improve driving performance of your vehicle. It installs easily and can be removed at any time without leaving a trace and error in the control series car.

## The control unit Mpower gold

It is the new electronic Additional designed to improve the performance of new turbo diesel engines / common rail.

Increases power up to 30%. The engine is more efficient, electronic and mechanical components of the engine are not compromised and consumption are significantly reduced, in compliance with current anti-pollution standards.

## Installation

Install the additional unit Mpower Gold is quick and easy.

Just plug it in to the original wiring of the motor so that it bypass between the latter and the injection system.

In this way the controller is not compromised serial since no action is taken directly on it. You can remove the additional unit Mpower at any time and return to the original power, without a trace in the engine and the computer's memory.

## Engines on which you can install the control unit

The additional unit Mpower Gold can be installed on all vehicles equipped with engines, turbo diesel, TDI with common rail injection systems, injector pump, rotary pump.

## **Setting Mpower gold 3.0**

Adjust and re-map the additional unit is very simple.

Thanks to dedicated software SW Power connected to the unit via the supplied USB cable, you can adjust the sliders that appear in the GUI.

This feature allows the engine revs to your driving style.

## **Operation of the controller**

The additional unit is managed by a tuning chip that communicates with the control series and optimizes the return signal achieving greater power and improved performance.

## **Remote control wi-fi**

The remote control wi-fi provided through option allows the ON and OFF to enable or disable the device.

## **Package Contents**

- Add-on Mpower
- Wiring the original installation
- Remote control wi-fi (optional)
- Processing Software (Reserved exclusively for installers only)

## **Kit Totem Mpower**

Ask your retailer how to get the exhibitor kit Mpower.

## **Telephone technical support**

Telephone assistance, additional to that email provides the technical support for the products and services provided by electronic Celeste Car Tuning.
